

TraFix[®] Zn

Zinc With Zip!

TraFix Zn: The Value-Added, High-Quality Zinc That Gives You Extra Benefits!

TraFix Zn is a specialized, liquid zinc product that can put extra zip in your zinc application. This new, unique formulation contains high-quality ingredients for superior results and value-added agronomic benefits for your corn crop.

Those ingredients include growth-promoting agents and nutrient solubilizers, a chelating complex, 10% zinc and 4.5% sulfur. Plus, TraFix Zn is more economical than EDTA-based zinc products.

Extended Zinc Uptake

The organic acids in TraFix Zn help slow the breakdown of chelating agents, which extends the uptake period of this unique product. And that can result in faster, more extensive root development. *TraFix Zn is an extremely stable, easy-to-mix product* that is especially effective with high-phosphorus liquid starter fertilizers.

Advantages of TraFix Zn

- *Extended zinc uptake*
- *Growth-promoting agents*
- *Nutrient solubilizers*
- *High-quality formulation*
- *Extremely stable*
- *Easy to mix*
- *100% water soluble*
- *Highly efficient zinc uptake & availability*
- *Non-corrosive*
- *Stable in cold temperatures*
- *More economical than EDTA-based zinc products*
